Master degree in
**Economics and
political science**

FACOLTÀ DI
**Scienze Politiche,
Economiche e Sociali**

Applications and admissions

Open subject to entry requirements.

Admission requirements

The Master in Economics and Political Science is intended for top level international students.

Admission is based on academic excellence. Applicants should have a bachelor's degree or equivalent; a strong interest and/or previous studies in economics, political science or related subjects; undergraduate or graduate training in mathematics and quantitative methods or a strong motivation to quickly fill their gaps in these fields; a sound knowledge of spoken and written English.

The evaluation process will take into consideration the applicants' prior academic records and their performance at the interview.

Detailed eligibility requirements can be found at eps.cdl.unimi.it.
Applicants meeting eligibility requirements will be invited to a skype interview.

Objectives

The Master in Economics and Political Science aims at providing its students with advanced and complete training in both economics and political science. Such training should be comparable to that offered by any leading international master's programme in each of the two disciplines.

Specifically, the programme aims at forming professional economists and political scientists separately taken. The graduates will not only be endowed with high-level analytical and operational skills, but they will also be characterised by such a cultural depth that could hardly be achieved by attending a programme centred on a single or prevailing disciplinary field.

Career prospects

The Master in Economics and Political Science degree is designed to train students in advanced methodologies, analytical tools and quantitative and qualitative techniques used in all fields of economics and political science. Economics and Political Science graduates will be ready to undertake a wide array of career paths in multinational companies, political institutions, public organizations, and other professions demanding high intellectual skills, robust technical competencies and versatile knowledge. They will also be well prepared to engage in further academic studies in top PhD programmes.
